ABOUT ME

Computer Science student at Suan Dusit University pursuing a career as a **Network Engineer**. Hands-on experience designing and managing network infrastructure, automation, and security through real Home Lab projects. Committed to continuous learning to deliver reliable, secure, and professional-grade systems.

EDUCATION

• 2022 - Present	Suan Dusit University	Major: Computer Science
• 2016 - 2022	High School	Mathematics - English Program (Suratpittaya School)

PROJECTS

Secure Hybrid Infrastructure IaC Designed and deployed a highly secure, simulated network infrastructure featuring 3 internal servers, automated via Infrastructure as Code (IaC) principles. The system includes a comprehensive monitoring stack using Prometheus and Grafana for real-time infrastructure visibility and performance tracking. HR Intelligent RAG Chatbot Developed an HR RAG Chatbot designed to query and answer questions from company policy documents using Python, Streamlit, ChromaDB, and the Gemini API. The system strictly constrains responses to the actual data within the employee handbook to mitigate hallucinations and ensure factual accuracy.	Automated Backup System Designed and implemented a highly secure, automated Home Lab backup infrastructure using Ansible to orchestrate Restic and Rclone. The system encrypts and backs up critical data—including Docker volumes, configurations, and PostgreSQL/SQLite databases—directly to Google Drive, featuring real-time status alerts integrated via Discord Webhooks. Freelance Matching Online Developed a freelance job-matching platform utilizing PHP for robust server-side processing and backend logic, integrated with Leaflet and Geoapify API to enable precise geolocation search and location-based filtering for users.
---	---

SKILLS

- **Networking & Protocols:** Cisco Routers & Switches, Cisco IOS, IPv4/IPv6 Subnetting, TCP/IP & NAT/ Routing, WireGuard VPN, DNS/DHCP, Wireless Access
- **Systems & Security:** Linux Server Admin, Active Directory & GPO, Firewall (UFW & iptables)
- **Tools & Automation:** Ansible (IaC), Vagrant, Docker, VirtualBox, Git, Python & Bash Scripting

CERTIFICATIONS

- Networking Basics (Cisco Networking Academy)
- Networking Devices and Initial Configuration (Cisco Networking Academy)
- Network Addressing and Basic Troubleshooting (Cisco Networking Academy)
- Network Support and Security (Cisco Networking Academy)
